D 14/989-90

ASCS Commodity Fact Sheet

1989-90 DAIRY PRICE SUPPORT PROGRAM

United States Department of Agriculture

Agricultural Stabilization and Conservation Service

May 1990

BASIC LEGISLATIVE AUTHORITY

The basic provisions of the Agricultural Act of 1949 (1949 Act) required that the price of milk to producers be supported at such level between 75 and 90 percent of parity as would assure an adequate supply of milk, reflect changes in the cost of production, and assure a level of farm income to maintain productive capacity sufficient to meet future needs. However, since October 21, 1981, the support price has been established by Congress at specific price levels, rather than parity levels.

CURRENT LEGISLATIVE AUTHORITY

The Food Security Act of 1985 amended the 1949 Act to continue the support price at $11.60 per hundredweight (cwt.) for milk containing 3.67 percent milkfat (originally established at this level on July 1, 1985) for calendar year (CY) 1986 and established the support price at $11.35 per cwt. for the period January 1 through September 30, 1987, and $11.10 per cwt. for the period October 1, 1987, through December 31, 1990.

However, the Act requires that on January 1 of 1988, 1989 and 1990, the Secretary of Agriculture shall reduce the support price 50 cents per cwt. if net CY price support purchases are projected to exceed 5.0 billion pounds milk equivalent or increase the support price 50 cents per cwt. if net purchases are projected at not more than 2.5 billion pounds milk equivalent.

The reductions are conditioned upon the milk termination program (see below) achieving a reduction of production by participants in that program of 12 billion pounds, or a certification by the Secretary that reasonable offers were made by the Secretary to achieve that reduction, but were not agreed to by producers. Because that level of reduction was achieved and it was estimated that net purchases would exceed 5 billion pounds, the support level was reduced to $10.60 per cwt. on January 1, 1988.

A82.82/2:

READEX FICHE best copy available

Other provisions of the 1985 Act included a 40-cent per cwt. reduction in the price received by producers for all milk produced and marketed for commercial use within the 48 contiguous States during April 1 through December 31, 1986, and 25 cents per cwt. during January 1 through September 30, 1987. However, to reduce outlays required by the **Balanced Budget and Emergency Deficit Control Act of 1985** (the Gramm-Rudman-Hollings Act), the **Food Security Improvement Act of 1986** further amended the 1949 Act, to provide an additional 12 cents per cwt. reduction from producer proceeds for the period from April 1, 1986, through September 30, 1986. The **Omnibus Budget Reconciliation Act of 1987** requires a 2.5-cent per cwt. reduction in producer proceeds for CY 1988.

To reduce outlays required by the Gramm-Rudman-Hollings-Act by $7.6 million in FY 1990, a 6.3 cents per cwt. reduction in producer proceeds for the period January 1, through January 31, 1990, is required. The reduction must be collected and remitted to CCC by February 28, 1990. Spreading the collection of monies over the remaining months of the fiscal year would be impractical because of the amount involved, inefficient and onerous on interested parties.

The 1985 Act prohibits the Secretary from considering the market value of whey in calculating the CCC purchase prices for dairy products. The Secretary is further required to offer at least 1 million pounds of surplus nonfat dry milk annually on a bid basis for manufacture into casein, and to establish a program to encourage additional exports of dairy products.

The 1985 Act also provides that the Secretary has the option to establish a milk diversion or milk production termination program for CY 1988, 1989, or 1990.

The Disaster Assistance Act of 1988 (P.L. 100-387) further amends the 1949 Act by deleting the authority of the Secretary to reduce the price support level for milk on January 1, 1989. The 1988 Act also provides for a temporary increase in the support price--50 cents per cwt.--effective April 1, 1989, through June 30, 1989, to $11.10 per cwt.

P.L. 101-7 (signed by the President on March 29, 1989) further amends the 1949 Act by requiring that the Secretary of Agriculture, in carrying out the temporary 50 cents per cwt. increase provided for in the 1988 Act, shall provide that at least 75 percent of such price support increase be reflected in the purchase price for nonfat dry milk and not more than 25 percent of such price support increase shall be reflected in the purchase price for butter. The 1989 Act also provides that, in implementing the 50 cents per cwt. decrease scheduled to occur on July 1, 1989, the Secretary shall allocate the decrease between the two purchase prices in such manner as will result in the lowest level of expenditures to the Government.

Accordingly, in allocating the purchase price increase effective April 1, 1989, the price support increase was applied 100 percent to the purchase price for nonfat dry milk. In allocating the price support decrease effective July 1, 1989, 100 percent was applied to the purchase price for butter. The support price reverted back to $10.60 per cwt. at that time.

Effective January 1, 1990, the support price was reduced from $10.60 to $10.10 per cwt., in accordance with the Omnibus Budget Reconciliation Act of 1989. This Act provides that the Secretary may reduce the milk support price by not more than 50 cents per cwt. if purchases of surplus milk and dairy products during calendar year 1990 are estimated to exceed 5 billion pounds, milk equivalent.

The Act further provides that the Secretary must offer to purchase butter for not more than $1.10 per pound, except that the Secretary may allocate the rate of price support between the purchase price for nonfat dry milk and butter in such other manner as he determines will result in the lowest level of expenditures by CCC. Therefore, to better reflect current market conditions, all of the decrease in the support price for milk used in manufacturing butter and nonfat dry milk was allocated to the CCC purchase price of butter.

MILK PRODUCTION TERMINATION PROGRAM

Under the program, which began April 1, 1986, 13,988 dairy farmers who marketed 12.3 billion pounds of milk in CY 1985 entered into contracts with CCC, through bids, to dispose of their entire dairy herds and terminate any interest they had in the production of milk or in dairy cattle for a period of 5 years.

The accepted bids ranged from $3.40 to $22.50 per cwt. and averaged $14.88. CCC is expected to pay out $1.8 billion during the 5 years of the program.

SELLING NDM FOR CONVERSION INTO CASEIN

Due to the lack of interest on the part of the dairy industry, this program was discontinued in marketing year (MY) 1987-88. CCC accepted only one offer in 1986-87, totalling 79,926 pounds of NDM.

SUPPORT PRICES

Support prices for milk since 1949 and other pertinent information, including support prices for milk with a milkfat content of 3.5 percent, may be found in Table 2.

METHOD OF SUPPORT

To carry out the milk price support program, CCC offers to buy carlots of butter, cheese and nonfat dry milk in bulk containers at announced prices, thus providing a floor for milk and dairy product prices. CCC's announced purchase prices since 1949 are shown in Table 3. The calculation of the latest purchase prices can be found in Table 1.

RECENT SITUATION

Prices received by farmers for manufacturing milk for MY 1988-89 which began October 1, 1988, averaged $11.93 per cwt. for milk containing 3.67 percent milkfat compared with $11.03 a year earlier. The weighted average support price was $10.72, the same as last year. Milk production for MY 1988-89 totalled 144.6 billion pounds, down 0.2 billion pounds from a revised year earlier production. CCC's removals under the dairy price support program decreased from 9.7 billion pounds milk equivalent in MY 1987-88 to 9.2 billion pounds of milk in MY 1988-89. CCC's net cost for the dairy price support program in MY 1988-89 totalled $679 million.

PURCHASES IN SPECIAL FORMS OR CONSUMER-SIZE PACKAGES

In addition to its purchases of bulk products at announced prices, CCC has historically purchased butter, cheese and nonfat dry milk in special forms or in consumer-size packages. The price for products in consumer-size packages includes an allowance for the additional processing and packaging costs. Although such purchases are more economical because of savings in packaging, handling and transportation costs, they do not utilize the oldest inventory first.

Purchasing products in consumer-size packages enables CCC to supply larger quantities of products under the sales and donation programs.

Mozzarella cheese is purchased exclusively on a bid basis for use in the domestic school lunch program. Instantized, vitamin-fortified nonfat dry milk is used only in domestic feeding programs, while non-instantized, vitamin-fortified nonfat dry milk is used only in foreign sales and donation programs.

PROCESSING AND REPACKAGING

In order to facilitate their use, most products purchased in bulk form are, from time to time, processed and/or repackaged in forms suitable for sales and donations. These services, which are contracted through competitive bids, include: repackaging bulk butter into 1-pound prints, processing butter into butteroil; processing block or barrel cheese for use in 5-lb. loaves, cutting and rewrapping Cheddar cheese into 1-pound loaves; and, instantizing and/or fortifying nonfat dry milk with vitamins A & D. One-pound loaves of Cheddar cheese are used for resale in military commissaries overseas. Other products are used in both foreign and domestic sales and donation programs.

PURCHASES AND SALES

During MY 1988-89, net purchases of dairy products delivered to CCC totalled 420 million pounds of butter--gross purchases of 429 million pounds less 9 million pounds sold for unrestricted use, and 46 million pounds of cheese. In addition, 26 million pounds of evaporated milk, 6 million pounds of concentrated liquid infant formula and 490 thousand

pounds of powdered infant formula were purchased pursuant to Section 4(a) of the Agriculture Consumer and Protection Act of 1973 for distribution to needy persons. Purchases of the above products were equivalent to 9.2 billion pounds of milk on a fat solids basis--about 6.4 percent of all milk marketed during the marketing year.

The world market price for nonfat dry milk rose above the domestic support price in June 1988. Strong domestic demand and commercial export sales are utilizing all the available supplies. Consequently, CCC did not make any purchases of nonfat dry milk during 1988-89 MY.

When CCC has significant quantities of dairy products in inventory, sales for unrestricted use prevent market and consumer prices from rising above the equivalent of CCC's sales prices. Since the spring of 1981, the minimum sales prices have been 110 percent of CCC's purchase prices at the time of the sale by CCC. However, due to the greatly reduced inventories of nonfat and cheese during the year, both of these products have been removed from the CCC Sales List.

UTILIZATION

About 183 million pounds of butter, 126 million pounds of cheese (including 16 million pounds of Mozzarella) and 19 million pounds of nonfat dry milk were used in domestic donation programs. Foreign donations under Section 416 of the 1949 Act totalled about 10 million pounds of butter. Export sales of milkfat (butter and butteroil) by CCC totalled 196 million pounds butter equivalent.

INVENTORIES

As of September 30, 1989, the uncommitted inventory of butter was 191 million pounds. There were no uncommitted inventories of cheese and nonfat dry milk. This compares with 161 million pounds of butter, 44 million pounds of cheese and 9 million pounds of nonfat dry milk as of September 30, 1988.

EXPENDITURES

During FY 1988-89, net expenditures under the milk price support and related programs totalled $712 million.

The net expenditures on dairy price support and related programs are set out in Table 2.

NET EXPENDITURES AND OTHER TABULAR SUMMARIES

Purchases, utilization and inventories of dairy products since MY 1977-78 can be found in Tables, 4, 5 and 6. Purchases of dairy products by type and package size since MY 1977-78 are set out in Table 7. CCC's net realized losses (expenses) and net expenditures for the dairy support program since FY 1978 are shown in Table 8, and outlays, since FY 1978, by dairy product, are shown in Table 9. Purchases of dairy products by State since MY 1977-78 are shown in Tables 10, 11 and 12.

This Program or Activity will be Conducted on a Nondiscriminatory Basis Without Regard To Race, Color, Religion, National Origin, Age, Sex, Marital Status, or Disability.

Table 1--Calculations of CCC purchase prices for dairy products with support of $10.60 and $10.10 per cwt.

Item	Effective July 1 through December 31,1989	Effective January 1, 1990
Support Price for manufacturing milk, $/cwt. at 3.67% milkfat	10.60	10.10

1/ Expenditures shown as follows: 1949-50 through 1963-64, fiscal year (July 1-June 30); 1964-65 through 1976-77, marketing year (Apr. 1-Mar. 30); 1976-77, 12-month period (Oct. 1-Sept. 30, 1976-77); 1977-78 to date, marketing year (Oct. 1-Sept. 30). 2/ Price support, Section 32, Section 709 and Section 4(a) purchases (delivery basis) of butter, cheese, nonfat dry milk, evaporated milk and dry whole milk, plus exports on which CCC issued payment-in-kind certificates, less CCC sales for unrestricted use. 3/ Net expenditures to CCC plus domestic and foreign donation expenditures. For 1964-65, includes costs of military milk program, and through 1965-66, the payment-in-kind export program. Includes costs of dairy products bought at market prices under Section 709 of the Food and Agriculture Act of 1965 in 1966-67, 1969-70, 1970-71, 1972-73 and 1973-74. Also includes costs of dairy products bought at market prices under Section 4(a) of the Agriculture and Consumer Protection Act of 1973 in 1973-74 and 1974-75. 4/ As of the beginning of the marketing year. 5/ As of April 1. 6/ Less than 50 million pounds. 7/ For 12-month comparative purposes. 8/ Revised.
